PROFESSIONAL SUMMARY

Data-driven analyst with 3+ years of experience turning complex datasets into decision-ready insight, now extending that same evidence-first discipline into marketing strategy through FlyRank's AI Marketing Internship. Combines Power BI dashboard development, SQL/Python-based analysis, and KPI reporting with hands-on experience designing AI-powered marketing workflows, brand systems, and portfolio architecture. Builds recommendations from verified evidence rather than assumption, in both data and marketing contexts.

CORE COMPETENCIES

Data Analysis & Visualization | Power BI Dashboard Design | SQL (Database Development, Transformation & Cleaning) | Python (Automation & Web Scraping) | AI Marketing & Prompt Engineering | AI Search Visibility Auditing (AEO/GEO) | Evidence-Based Marketing Strategy | Brand & Design Systems | Portfolio / UX Architecture | KPI Monitoring & Reporting | Market Research & Feasibility Analysis | Stakeholder Engagement | Digital Transformation

TECHNICAL SKILLS

Tools & Platforms: Power BI, Microsoft Excel (Advanced), SQL Server, Python, Next.js, Vercel, MS Word, PowerPoint, Meta Ad Library, Google Ads Transparency Center

Languages: SQL, Python

Marketing & AI Competencies: Multi-step AI prompt-chain workflow design, AI search citation analysis (Claude, ChatGPT, Perplexity), content and CTA architecture, brand identity systems (typography, color, accessibility), evidence-labeling frameworks

Core Data Competencies: Data Collection & Cleaning, Dashboard Development, Data Visualization, ETL Processes, Database Management, Financial & Market Data Analysis, IT Support & Network Administration

PROFESSIONAL EXPERIENCE

AI Marketing Intern — Dual Track: General AI Fluency & AI Marketing

2026 – Present

FlyRank (Remote)

- Designed and documented a repeatable 9-step AI prompt-chain workflow to audit brand visibility in AI search engines (Claude, ChatGPT, Perplexity), producing a citation-gap analysis and a dated 30-day content plan; validated the workflow on two brands (FlyRank and Semrush) at different visibility maturity levels to confirm it generalizes rather than fitting one case.
- Built and deployed a live Next.js portfolio site (26 static routes, hosted on Vercel) implementing a full brand design system — typography, an accessible color palette independently verified against WCAG AA contrast standards, and a reusable component library.
- Directed a 4-page content and CTA architecture (Home, Case Studies, About, Contact), scoring 10 candidate one-line positioning statements against 5 weighted criteria to select a final value proposition and CTA ladder.
- Led a case-study correction after direct verification showed a client's product had an unclaimed, rather than absent, G2 listing — changing the strategic recommendation from "get listed" to "get reviewed" and anchoring a verification-first habit applied across all later deliverables.
- Maintain an internal Prompt Library and evidence-labeling standard (every claim marked MEASURED, PUBLISHED BENCHMARK, or ESTIMATE) applied consistently across research, strategy, and content work.

Performance Marketing Analyst

January 2026 – Present

Axilcoils NextGenSoft Limited

- Collect, clean, and analyze large datasets to generate actionable business insights that inform strategic and operational decisions.
- Develop and maintain Power BI dashboards and automated reports for real-time performance tracking.
- Identify data trends, patterns, and anomalies to support strategic planning and improve operational efficiency.
- Collaborate with cross-functional teams to translate business requirements into data-driven solutions.
- Monitor key performance indicators (KPIs) and deliver continuous improvement recommendations to stakeholders.

- Communicate findings through clear data visualizations and executive-level reports.

Business Intelligence

June 2023 – Present

CVA Multi Services Nigeria Limited

- Collected, analyzed, and interpreted multi-source datasets to support strategic decisions across agriculture and enterprise sectors.
- Designed and maintained BI dashboards tracking KPIs and operational metrics, enabling data-informed management decisions.
- Conducted market research and data-driven feasibility analyses to guide project planning and investment strategy.
- Identified operational trends and insights that optimized business processes and increased efficiency.
- Collaborated on digital transformation and data integration initiatives across business units.
- Translated complex datasets into clear, actionable stakeholder reports that contributed to measurable revenue growth.

IT Support Officer

April 2024 – March 2025

Dolph Technology (NYSC)

- Provided technical support for hardware, software, and network-related issues, achieving high first-call resolution.
- Managed software installation, updates, and troubleshooting for enterprise systems.
- Assisted in database management, digital recordkeeping, and data integrity maintenance.
- Trained staff on IT tools and best practices, improving organizational digital literacy.

Intern – National Planning

March 2018 – November 2018

Federal Ministry of Budget & National Planning

- Assisted in data collection and documentation for national development planning projects.
- Supported policy documentation, reporting processes, and departmental research briefs.

Supply Chain Assistant

January 2014 – December 2015

Zobs Oil & Gas Limited

- Supported procurement, logistics coordination, and supply records management.
- Assisted in operational reporting, vendor documentation, and inventory reconciliation.

EDUCATION

Bachelor of Science (B.Sc.) — Mathematics & Computer Science

University of Port Harcourt, Rivers State, Nigeria | 2021 | Second Class Lower (2:2)

CERTIFICATIONS & TRAINING

- AI Fluency: Framework & Foundations — Anthropic
- AI Fluency for Builders — Anthropic, CodePath.org
- AI Fluency for Students — Anthropic, in partnership with University College Cork, Ringling College of Art + Design, Higher Education Authority, and the National Forum for the Enhancement of Teaching and Learning in Higher Education
- AI Fluency for Educators — Anthropic, in partnership with University College Cork, Ringling College of Art + Design, Higher Education Authority, and the National Forum for the Enhancement of Teaching and Learning in Higher Education
- Teaching the AI Fluency Framework — Anthropic, in partnership with University College Cork, Ringling College of Art + Design, Higher Education Authority, and the National Forum for the Enhancement of Teaching and Learning in Higher Education
- AI Fluency for Nonprofits — Anthropic, GivingTuesday
- AI Fluency for Small Businesses — Anthropic, PayPal
- AI Fluency: AI Capabilities & Limitations — Anthropic
- Claude 101 — Anthropic
- Information Technology (IT) Certificate — Dolph Technology (2024)
- Business Certificate — Global American Business Institute, GABI (2022)
